It's time to get a number of jobs done. Homeowners will want to get that first application of nitrogen on the lawn. You'll need 1 to 1 1/2 pounds of actual nitrogen per 1000 square ft.

* * *

Now's the time to get strawberries fertilized. They need to get one pound of 10-10-10- per 100 feet of row.

* * *

Beef cattlemen need to treat yearlings and calves that will be carried over the winter with a pour-on grub control. This must be done between August 1 and November 1.

* * *

It's not too late to get those blades off the harvester and have them sharpened. Sharp blades properly set is the first step toward high quality silage.

* * *

A number of dark tobacco producers have asked about the "third hand" advertised in the paper in recent days.

We have one and you'd like to see it, stop by our office.

* * *

Working with DeKalb Corn Company and Geigy Chemical Company there will be a tour of several farms where Geigy has herbicide tests. Also of interest to all corn growers will be a visit to DeKalb corn plots at the Hix Brothers' farm. There are 10 varieties of about .75 acres each. Some of the varieties are new and will probably be released for the first time next spring.

* * *

At the Flue-Cured Tobacco Field Day last week, we saw some of the latest innovations in tobacco mechanization.

* * *

There were four power operated topping machines that would cover two acres an hour. These machines were priced from $495 to $745.

I asked one manufacturer about the possibility of applying a sucker control material in the same operation. He said next year we'll have a kit that can be attached.

There was a tremendous amount of interest in the $11,000 primer. Some years ago at Reynolds Tobacco Farm in eastern North Carolina, I saw the prototype of this machine. Mechanization is on the way.

* * *

Mechanization is going to happen in dark tobacco also! In a few days dark growers will be getting a notice to see the new dark tobacco harvester. Watch for this letter.

Quite A Crop!

This has been quite a year for Appomattox farmers and tobacco growers! An example – Courtney Franklin (above, left) who raised this fine looking crop on the Alvin F. Spencer farm. Alvin Spencer is pictured at the right. Average size of each tobacco leaf is 16 inches wide and 31 inches long. Says Franklin, "Part of the credit goes to Southern States fertilizer." (Plus good growing weather, hard work, etc. – Ed. note).

Twin Tomatoes

Frank Ragland of Appomattox wishes to know if any gardeners in the county have grown twin tomatoes as he has. These Siamese tomatoes were grown in the joint garden of the families of Frank and Mr. J. R. Ford, Jr.

We agree with the grower that this was a real oddity from the garden.
